THE LEGAL VALUE OF CAPTURE DOCUMENTS

As an extra validation method to a handwritten signature alone, using Capture and the Anoto digital pen, additional system-provided information is added in a unique combination per page.

This information is gathered both upon creation and signature of the document using Capture.

It creates a unique way to verify the authenticity and integrity of the physically signed document and the electronic copy (PDF).

Thanks to additional unique identifiers, it is possible to prove the authenticity of Capture electronic documents while respecting the original copy:
